Education

2012 - 2016 – ISCED 3, [Mediamatician](#) Apprenticeship – [Somedia Production Web](#), Chur

2010 - 2012 – ISCED 2, Secondary School - [Hochalpinen Institut Ftan](#)

2008 - 2010 – ISCED 2, Secondary School - Domat/Ems

2002 - 2008 – ISCED 1, Primary school - Caguils, Domat/Ems

Professional Experience

In the first part of my apprenticeship I worked in many different departments at Somedia. I realised quickly, that I was mainly interested in programming. So I spent most part of my apprenticeship working as a full stack web developer, mainly working with JavaScript, PHP and CSS.

The most interesting project I worked on in my apprenticeship is my final project grossrat.suedostschweiz.ch.

Competencies & Skills

Competencies

- » Integrate quickly in new environments.
- » Open minded and sociable
- » Like sharing my knowledge
- » Am eager to learn
- » Good abstract-logical reasoning skills

Skills

Languages

- » Englisch
- » Deutsch

Programming Languages

- » JavaScript (ES5/ES6)
- » CSS & Sass/LESS
- » PHP

Other Technologies

DOM, React, Rx.js, Angular, Cycle.js, Riot.js, Meteor, JavaScript Build Systems (e.g. Webpack, Gulp, Browserify), JavaScript Libraries (e.g. jQuery, lodash), BEM, Mocha, Karma, Node.js, Docker, WordPress, Drupal 7, 8, VIM, Git / Git Flow, MySQL), MongoDB), Mac OS, Linux, Windows

References

Projects

Github

I like to work on open-source projects in my free time. Most of my projects are on my [Github profile](#).

grossrat.suedostschweiz.ch – Somedia Production

For the final project of my apprenticeship I visualised the polling data of the governing council in Chur (Grisons, Switzerland). For the polling data to be available in a structured way, I created a backend using Symfony with a JSON API. The biggest part of my project was the visualization of this data. To implement it, I used Cycle.js (a reactive UI framework based on Rx.js) to render the data dynamically.

suedostschweiz.ch – Somedia Production

suedostschweiz.ch is a news site I worked on at Somedia Production. One of my responsibilities was composing the technical concept for the frontend.

[elm:make](#) – FOSS/ free time project

elm:make is a Meteor package that compiles Elm code inside Meteor projects.

I wrote about some of my open source projects [here](#).

People

Fabian Dennler

CS-Teacher, Gewerbliche Berufsschule Chur & Consultant
